Professional Summary

Software Engineer with 7+ years of experience designing scalable distributed systems in banking and healthcare domains. Strong expertise in Java, Spring Boot, microservices and event-driven architectures (Kafka) with hands-on experience in AWS and OpenShift. Proven ability to own services end-to-end, drive system improvements, and deliver high-impact, customer-focused solutions.

Technical Skills

- Java, JavaScript, Python, TypeScript, SQL, OOPs
- Spring Boot, RESTful APIs, Spring Security, Hibernate, JPA, Spring MVC, Spring Batch, API Gateway, J2EE, Servlets
- React.js, Redux, HTML5, CSS, Node JS, Multithreading, Concurrency, Asynchronous Processing
- Cloud-Native Development: OpenShift, AWS, Docker, Kubernetes, PCF, Jenkins, CI/CD Pipelines, Argo CD
- MySQL, Maria DB, NoSQL, MongoDB, Cassandra, Redis (Caching); Apache Kafka, Elasticsearch, Flyway, Heidi SQL
- Git, Bitbucket, IntelliJ IDEA, VS Code, Postman, SonarQube, Grafana, Kibana, Junit, Mockito,
- Activiti BPMN, Scheduler, Cron Jobs, Jasper Reports, Stream API, Lambda Expressions, Prompt Engineering, AI Chatbots
- AI & GenAI: Claude Code, DevAI, ChatGPT, GitHub Copilot, Gemini CLI, Spring AI, OpenAPI, Anthropic Claude API, RAG

Core Competencies

- Microservices Architecture, RESTful API Design, Scalable Distributed Systems, Data Structures & Algorithms, Design Patterns,
- Event-Driven Architecture (Kafka), Cloud-Native Development, System Design (HLD, LLD), CI/CD Automation
- End-to-End service ownership, Performance Optimization

Experience

Software Engineer

July 2024 - Current

IBM India Private Limited | Client: DBS Tech India

[Hyderabad, India](#)

- Designed and owned 10+ microservices across investment, insurance, sales, and surveillance domains, supporting multi-country (6 Regions) banking platforms.
- Built high-throughput REST APIs (~100K+ requests/day) with optimized latency, improving response time by 30–40%.
- Architected event-driven communication using Kafka, processing real-time financial events across distributed services.
- Led end-to-end ownership (design → development → deployment → monitoring) for critical backend services.
- Implemented workflow automation using Activiti / Camunda, designing BPMN-based approval workflows to automate multi-step business processes, reducing manual approval effort by ~50%.
- Improved database performance via indexing and query tuning, reducing query execution time by ~40%.
- Set up observability (logs, metrics, alerts) improving production issue detection and MTTR.
- Built and optimized CI/CD pipelines, reducing deployment time by ~60% and ensuring zero-downtime releases.

Software Engineer (Full Stack Engineer)

Sept. 2021 – Jun 2024

Cognizant Technology Solutions | Client: CIGNA

[Bangalore, India](#)

- Developed scalable Pharmacy Benefit Management (PBM) platform handling large-scale healthcare workflows and transactions.
- Built Spring Boot microservices integrated with React, improving modularity and reducing coupling.
- Reduced API response time by ~35% using Redis caching and Elasticsearch optimization.
- Designed cloud-native deployments (AWS + OpenShift) with high availability and fault tolerance.
- Contributed to SaaS modules, reducing manual processing effort by 40%+.
- Handled production incidents, ensuring 99.9% uptime and reducing MTTR through faster issue resolutions.

Software Engineer

Jan 2019 – Sept 2021

Tata Consultancy Services Ltd | Client: FCA US

[Nagpur, India](#)

- Developed supply chain applications supporting manufacturing and inventory systems.
- Built full-stack solutions using Spring Boot + React, improving system usability and integration.
- Improved performance by 25% via backend optimizations and efficient database queries.
- Resolved critical bugs and improved system reliability in production environments.

System Design & Architecture Experience

- Designed microservices architecture with API Gateway, service-to-service communication, circuit breakers, and centralized logging.
- Implemented event-driven systems using Kafka for asynchronous processing
- Worked on scalable backend systems with caching (Redis) and search optimization (Elasticsearch)
- Experience with high availability, fault tolerance, and distributed system patterns.

Education

Bachelor of Technology

Institute of Engineering and Technology M.J.P Rohilkhand University

- Major in Electronics & Instrumentation Engineering

Aug 2013 – Jul 2017

📍 Bareilly, India

GPA: 72.40

Projects

DISTRIBUTED ORDER PROCESSING SYSTEM

- Designed a real-world scalable system using Spring Boot + Kafka + Redis + Docker.
- Implemented event-driven architecture with asynchronous processing.
- Handled order lifecycle (create → payment → inventory → notification) across services.
- Designed for high scalability and fault tolerance.

E-COMMERCE PLATFORM

- Built full-stack app with Spring Boot + React + JWT authentication + Stripe integration.
- Designed REST APIs and deployed on cloud with secure payment processing.

EMPLOYEE MANAGEMENT SYSTEM

- Designed and developed a spring boot and React based system with Rest APIs & database integration for managing employee data.

Certification

- **AWS** Certified Cloud Practitioner (**04/2025 - 04/2028**).
- **IBM** Generative & Agentic AI Consultant/Business Analyst - Experienced.
- **IBM** Generative & Agentic AI Foundation.
- Alpha 5.0 - Data Structures & Algorithms (Competitive programming).
- Coding Ninja - Full stack developer course.

Key Achievements

- Improved system performance by 30–40% across multiple services.
- Reduced deployment time by 60% using CI/CD automation.
- Built and maintained high-scale microservices systems in banking & healthcare domains.
- Mentored developers and conducted sessions on DSA & System Design.
- Used **Claude Code** & **DevAI** tools for code generation, optimization, and troubleshooting, reducing development effort & productivity.
- Active problem solver on **LeetCode**, **HackerRank**, and **InterviewBit**, focusing on data structures and algorithms.

Mentorship

- Mentor at JSpider Academy: Helping students and working professionals to get better at problem solving, coding and system design.
- **Computer Science Tutor**: Programming | Data Structure and Algorithms | career advice | coding interview prep | professional portfolio.
